# ALARM LOCK Tech Support

# TECH TIP

**Date:**      Tuesday, April 30, 2013

**Subject:**      Alternative method to "Default" any Alarm Lock Lockset

**Models:**      All Models with Numeric Keypads

When unable to "default" a lock (restore its original factory settings), try the following alternate method that works with any Alarm Lock lockset model with a numeric keypad:

1. Disconnect the battery.
2. Press at least 3 number keys, one at a time, for 3 seconds each.
   For example, press and hold the **1** key (for 3 seconds), then press and hold the **2** key (for 3 seconds), then press and hold the **3** key (for 3 seconds).
3. Press and hold the **AL** key; continue holding while you connect the battery, and continue holding for an additional 5 seconds after connecting the battery.

The lock will be reset back to its original "out of the box" factory programming.
