With pdqSMART-XLS, keys are eliminated. Gone are the days of changing out locks between tenants, just reprogram the door's code and your new tenants are good to go! Every user, young and old get to choose the credential they find most comfortable. Bluetooth 5.0 communications adds more reliability and security than Wi-Fi or Z-Wave.

# CONTROL AT YOUR FINGERTIPS

Manage all of your locks from one centralized, simple, easy-to-use dashboard. pdqSMART's cloud based platform gives you complete control from anywhere, any time! Easily grant or revoke access to any door from your smartphone or laptop. Give access to staff and services only when they need it. The real-time tracking system gives you an audit trail of who's coming and going and scheduling capabilities.
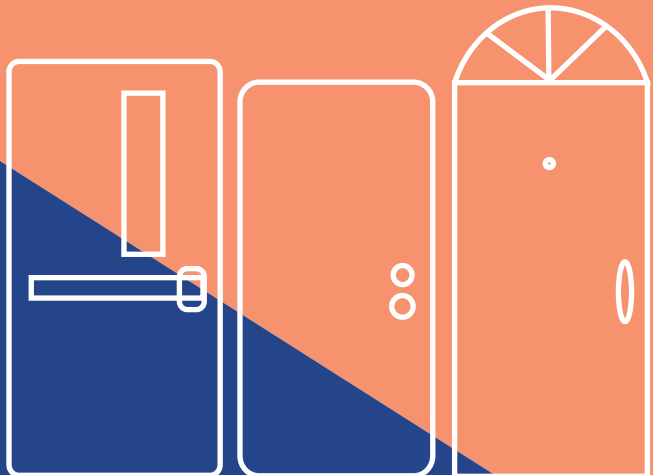

# SECURE
## EVERY DOOR

Secure one or hundreds of doors, manage access from anywhere. American made, commercial grade locks combined with AES 128-bit encryptions keeps your building safe from intruders and hackers.

pdqSMART has a smart lock for every access control need; main entrance, unit doors, common areas, offices, storerooms, utility/IT closets, secure rooms, stairwells, emergency exits, garage, gates and more!

Perfect for new or retrofit applications. It's fast, easy, and affordable to replace existing locks. pdqSMART fits in the same mounting holes as your current locks. Installation is a breeze; no hard wiring, no servers or IT guru required, just plug and play. Locks are powered by Bluetooth 5.0 communications and 4-AA batteries. Our locks will continue to operate even when the power or Wi-Fi goes down.

Locks and software app are all from the same company. That means hardware and software updates become seamless. No more runarounds and finger pointing when problems occur. With simple and easy to use mobile applications and the unlimited power of cloud computing, pdqSMART wireless locks can deliver the smooth and secure access end users need, when and where they need it.

**24**

# pdqSMART®

The cloud-hosted access control platform is easy to engage allowing users the flexibility they need to manage their sites. Situations evolve quickly and you need to be able to change access rights accordingly from anywhere at any time. With pdqSMART administrators find it fast and simple to manage their environments and their users.

# EFFICIENCY & COST REDUCTION

With pdqSMART wireless locks and cloud infrastructure you won't need to break the bank. No hard wiring, no on-site servers, software, or IT gurus are required. Your investment is protected because locks are future proofed with automatic upgrades and updates. Mobile access to data keeps team members instantly in the loop while the cloud keeps your data safe and secure.

Todays high speed life demands 24/7 access control that is quickly configurable and has data available at a moment's notice. With real-time communications, pdqSMART gives you commanding control over access and the ability to configure at scale and integrate with other building systems. By harnessing the technological power of the Internet of Things, the IoT, pdqSMART delivers the solutions of the future, today.
